

Aura Pendant

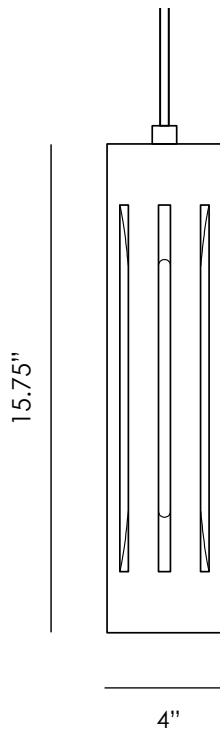

Sculpted from a single marble block, Aura is a contemporary reinterpretation of the ancient outdoor lanterns, made possible by the finest techniques in stone fabrication. Vertical cuts on the cylindrical surface allow light to pass throughout the entire inside of the sconce while the translucency of the marble evokes transcendence and spirituality.

When the lamp is lit up, the natural veins of the stone become dark, creating a dramatic effect of contrast. When the lamp is off, Aura becomes a sculpture and shows all the beautiful colors of an extraordinary stone.

Handcrafted in Italy
