

James

Finely handcrafted in Italy and studied down to the smaller detail, James console offers the maximum adaptability to any use and spatial need.

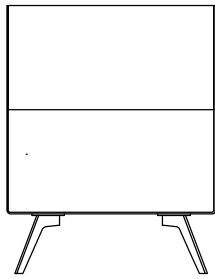

Clean lines and sharp edges, where different noble materials meet with lightness and elegance, form a perfectly squared body supported by tilted thin legs.

The cabinetry, made with first choice walnut or oak, can be organized in several configurations and is completed by a top in natural stone.

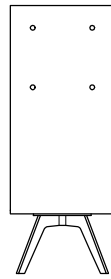

Available in 2 sizes and several configurations of doors/drawers, James can be used as console, storage system or home bar.
